## CARE AND MAINTENANCE.

The precision mechanism in your watch will provide long-lasting performance when properly cared for. We recommend taking your watch to an Authorised Retailer

Authorised Service Centre every 3-4 years for a check-up and to perform ordinary maintenance on all mechanical parts. We also advise taking your watch to an

Authorised Retailer / Authorised Service Centre to change the strap. Avoid leaving your watch where it is exposed to large temperature variations, humidity, the sun and strong magnetic fields. Remember to rinse the watch after it comes into contact with seawater.

We suggest pulling out the crown when the watch is not being used for a long period of time in order to limit battery consumption. We advise taking your watch to an

Authorised Retailer / Authorised Service Centre to replace the battery.

Optimal operating conditions 0°/+60°C when not work.
